

DISCOVERING SCIENCE AND HEALTH AND ITS AUTHOR

'The book continues to give me answers. It's an invaluable book for life.'

with contributions from Janet Clements, Nancy Bennett Larr, Lizbeth Furst, Nancy Robison

From the June 2002 issue of *The Christian Science Journal*

Readers of Science and Health with Key to the Scriptures, whether they're picking up the book for the first time or have been reading it for decades, have been reporting healing results since the book was first published over 125 years ago. Below, a few of today's readers share how this book is bringing transformation and healing to their lives.

"I Bought my first paperback copy of *Science and Health* while I was in college. The ideas in it were like a lifeline tossed to me in deep waters. At that time, I was struggling with life-threatening physical problems. There were times when I didn't think I could go on. But each time I felt like I had come to the end of my line, I always found an answer in that book. It never failed. These answers were like beacons of light, dispelling the darkness of paralyzing fear and wrapping me in the peace of God. I read the book through continually, each time using a different color of highlighter. When I opened the book, it was awash with a rainbow of colors, all signifying inspiring truths that had touched the very heart of my being. Reading the book so filled my thought with new views of myself that the darkness of fear and disease were no longer present. I was healed and free to finish college and go forward in my career. The book continues to give me answers. It's an invaluable book for life."

I Had Just Started to teach kindergarten when I developed a severe case of acne. I was beside myself trying all sorts of remedies to cure it. It was such a severe case that I was told by my dermatologist to expect scarring. I began to take about 20 pills a day, as well as having X-ray

treatments, but my skin kept getting worse. A friend I met while in graduate school gave me a copy of *Science and Health with Key to the Scriptures* and suggested that it might be helpful. I had always believed in God in an abstract sort of way, but never really thought of Him as being very involved in my life. I started reading *Science and Health* and loved the fact that God made me in His image and likeness, and that image did not include acne. I was healed, and the skin on my face has no trace of scarring. I have continued to study the book and have had many wonderful healings since then. How grateful I am to that friend who shared a copy of *Science and Health* with me."

Science And Health has had such an enormous impact on my life that I would not want to live without what it has taught me about God. I grew up very afraid of God. After reading *Science and Health*, it was such a relief to learn that God is Love! As I grasped the book's answers to spiritual questions, I became less fearful, less self-concerned, and more relaxed. Splitting headaches that would linger for days suddenly ceased.

"There are no words sufficient to tell of the deep inner peace, the security and serenity, that comes from feeling God's presence, from recognizing that the only reason I exist—the only thing I have to do—is to reflect God and to listen for His voice."

Lizbeth Furst
Springdale, Arizona

Every Time I read *Science and Health*, I'm amazed at the insight and comprehensiveness of Mary Baker Eddy's writings. Although she wrote the book over 125 years ago, the subject matter is very relevant today. My mother encouraged me to read the book whenever I needed an answer to anything, and indeed, through the years, there have been plenty of problems needing answers, such as challenges with sickness, marriage, and career. She also told me that reading and studying the book gives one the equivalent of a college education. Mrs. Eddy has covered every subject—from physics to arts and sciences to astronomy—in her writings. She said that to read her rich words is better than a course in English.

"I proved the ideas in *Science and Health* to be effective when it became necessary for me to drop out of college, due to shortage of funds. Through prayer and studying the book, I went on to have a successful career in the arts—acting, dancing, writing, and photography. It has truly been an education to read *Science and Health* through from cover to cover, which I do over and over again. Each time I read it, something 'new' that I hadn't noticed before appears.

"Through every trial and tribulation, for over 60 years, I have found answers in reading and studying this book."
